Skills

JavaScript, CSS, HTML, React, Express, Node.js, MySQL, git, npm

Personal Projects

Kanji Pre-Reader - Web Application

React, JavaScript, CSS, HTML
- Built a web application for Japanese language students to study kanji characters by creating custom study sheets from the text of their choosing
- Features include a filter section for selecting desired kanji, and PDF document rendering of study sheets for download with full page preview

Chatter-bot - Web Application

React, JavaScript, CSS, HTML, Express, Node.js, MySQL
- Built full stack web application for users to engage in topical discussion
- Features include user accounts with encrypted passwords, and pre-validated forms for creating custom chat rooms or posts

Spiral Designs - Interactive Website

JavaScript, CSS, HTML
- Built a simple visual website that displays an arithmetic spiral animation
- Features include a settings toolbar that allows for real time manipulation of the spiral's color, size, and background

Education

North Central College - Naperville, IL

Bachelor of Arts - Japanese, East Asian Studies

Iwate University - Morioka, Iwate, Japan

Certificate of Completion - International Short-stay Studies Program

Languages
- Native English
- Basic conversational Japanese
